I have professional experience as a creative React developer, and my area of expertise is creating aesthetically attractive, high-performing web applications. My area of expertise is using React to create front-end solutions that are responsive and smooth while maintaining a constant focus on quality and efficiency. In my most recent freelance online job. Being a collaborative person by nature, I thrive in bringing creative concepts to life by collaborating easily with back-end developers, designers, and stakeholders. In addition to my technical expertise in HTML5, CSS3, and JavaScript, I'm dedicated to lifelong learning and remaining up to date with new technologies, which I achieve through online courses. ITI Institute in 2022 awarded me a diploma after I completed my studies there in nine months.

PROJECTS

NOV 2023

BAGY BAGS WEBSITE

I successfully designed and implemented a captivating landing page for a bags brand, utilizing the power of React for dynamic user interfaces and integrating the sleek styling of Tailwind CSS to achieve a modern and visually appealing presentation.
